Re: Amro Ali, MD

Dear Program Director:

I am writing in strong support of the application of Dr. Amro Ali for a residency position in the Ophthalmology Department at your institution. Dr. Ali is currently an associate research scientist in the laboratory of Dr. Frederick Naftolin, Professor of Obstetrics and Gynecology at the New York University School of Medicine. I have known Dr. Ali and observed his work since he joined our department in 2011.

Dr. Ali is a highly qualified applicant, having completed his undergraduate medical training and masters degree in ophthalmology, plus an additional two years of general ophthalmology experience in Alexandria, Egypt. He has completed fellowships in a number of prestigious US programs, including Henry Ford Health Care (neuro-ophthalmology, retinal disease), New York Eye and Ear Infirmary (uveitis), and the Casey Eye Institute of Oregon Health Science University (uveitis, retinal disease). He has general surgical experience obtained as an intern at North Shore University.

In his capacity at NYU, Dr. Ali is investigating the effect of female sex steroid hormones on the course of ocular inflammatory disease and the effects of neuroprotective agents, including CD34 positive stem cells on injured retinal ganglion cells. He recently co-authored a book chapter on CMV retinitis for the Wills Eye Institute, and a book chapter concerning diagnostic leads for uveitis in the publication *Curbside Consultation in Uveitis: 49 Clinical Questions*. Along with these publications, Dr. Ali has produced eight peer-reviewed articles and four abstracts of high caliber. He is extremely proactive in envisioning new areas of research and in the design and initiation of original studies. He has been an invaluable member of the research team in Dr. Naftolin's program and he has contributed significantly to the studies undertaken with his extensive ophthalmologic experience that is unique in our department.

Dr. Ali has the intense dedication and interest that make an excellent resident, along with a warm and caring approach to patient care. He is hardworking, respectful, creative and diligent in his work and it is my hope you will strongly consider him for your program. You will find that his background and mature judgment make him an outstanding addition to the team and his patient care skills will be a model for others. I recommend him to your program without reservation and would be happy to discuss his capabilities in more detail if you wish.

Sincerely,

A handwritten signature in cursive script that reads "David Keefe".

David Keefe, MD
